Océ Engineering Copy Bond is also available with recycled paper. The environmentally friendly choice for engineering and digital copiers. This paper consists of 50% recycled fiber; 20% post consumer.

Océ Color Tint Engineering Bond is also available in blue, yellow, green or pink. Tinted paper is ideal for security copies and change notices.

Océ Plain Paper Copier Non-Erasable Vellum is a durable, 100% rag, solvent-free vellum, specially formulated for compatibility with all plain paper engineering copiers. It is ideal for archive copies, long run diazo masters, and general purpose originals created by laser plotting, pen plotting or manual drafting.

Azon Diazo Opaque Paper is used to make positive line prints from translucent original drawings, letters, documents, layouts, etc., or from intermediate prints (either paper or film).. Prints are sharp and clean, with excellent image density on a brilliant white background. Standard Speed produced copies with the highest image density and visual contrast. Rapid Speed is the most widely used opaque paper. Medium Rapid Speed for use on table top whiteprinters where improved density is required. Extra Rapid Speed excellent speed/density relationship for console type whiteprinters.

Océ Bruning Ammonia Process Opaque Paper produce high quality copies with sharp dense lines from a variety of originals. Whether you use a specific sheet size or convenient rolls, Bruning has an opaque paper to meet your particular specifications. Three speeds are available, Medium Speed is used for maximum production with dense line image utilizing high wattage mercury vapor whiteprinter. Fast speed is used with most fluorescent machines and low wattage mercury vapor machines. The most popular speed with the best combination of speed and quality. Extra Fast speed is used when high production is required, i.e. checkprinting. Used with most fluorescent and low wattage mercury vapor whiteprinters.

DIAZO DEVELOPERS

Ammonia Developing Solution is for ammonia process machines. Ammonia is available in 24° or 26° baume. 110oz.

| | | |
|----------|-----------|-------------|
| MIC11233 | 26° baume | 7.81 |
| MIC11833 | 24° baume | 7.81 |

EX-SCENT significantly reduces the noticeable ammonia odor found with older or high volume users of tabletop diazo machines. For diazo machines that have ½ gallon ammonia capacity, add one bottle of concentrated EX-SCENT to a fresh bottle of aqua ammonia. For machines with a 1 gallon capacity add two bottles of concentrate.

REPROGRAPHIC SUPPLIES

Omnitrac 120EF Blueprint Machine is designed for minimal maintenance incorporating such features as a corrosion resistant developer chamber, user-friendly solid state speed control, a precision glass printer cylinder, and high output fluorescent lamp. There is a forward/reverse switch, an instant on/off switch, and a single dial dual range speed control that can be switched from normal high speed range to a more flexible low speed range for making precision specialty intermediates. 48" print width full feature.

DIA6281 With Sling Stand, Built-in Ammonia Arrestor System Feedboard or roll box is required. **1995.00**

DIA6282 Tabletop with Ammonia Arrestor System Feedboard is required. **1895.00**

Accessories for Omnitrac 120EF

DIA7013 Roll Box **135.00**
 DIA7016 Feedboard Only **30.00**

Omnitrac EFP Blueprint Machine operates at maximum printing speeds of 24 fpm and has a maximum print width of 48". It uses a powerful 360 watt VHO fluorescent lamp which offers printing speeds equivalent to two and three lamp diazo copiers. The prints are exposed safely on a glass cylinder rather than contacting the hot surface of the fluorescent lamp. The ammonia developer is corrosion-resistant for durability and a minimum of maintenance.

DIA6190 Console model with roll and sheet storage, front delivery print stacking tray. **2595.00**

DIA6196 Console model with roll storage, front delivery **2545.00**

DIA6180 Tabletop or optional stand mounted Ammonia Arrestor Blower included. **1995.00**

Diazit AF101 Ammonia Free Blueprint Machine for those special situations where no odor is a requirement. It is environmentally friendly. Blueprint production is fast and easy. The AF101 prints on a precision glass cylinder for optimum contact between the original and copy paper. A single 250 VA super diazo fluorescent lamp and a synchronized developer section make copying a snap. It is a compact, self-contained copier and does not have tubes hoses or absorber filters. No warm up is required. A single switch offers instant on/off operation and energy savings. One Year Limited Warranty.

DIA6090 AF101 Machine **2195.00**

Diazit AF-303 Ammonia Free Blueprint Machine same as AF-101 but with three lamps with speeds up to 35 ft/min.

DIA6095 AF303 Machine **2995.00**

Diazit Activator

DIA6010 4/CTN-250ML Bottle of Activator **48.00**
